Eleanor is a sweet, moderate framed, deep bodied young lady. Other than her color she is the spitting image of her dam. Her dam Honey Creek Sophie tragically died on 9/11/23 due to API (acute interstitial pneumonia). Sophie had a great demeanor, very deep bodied, perfect feet and udder. We are hoping and praying for Eleanor to be the same way. Eleanor is going to serve as a replacement for her Dam and hopefully live out a long and healthy life
